

Speaker 1 - 00:00

Right.

Speaker 2 - 00:01

So I was just telling her that it gets really cold inside because the walls get really cold, so. Yeah. You have heating or you don't have heating there?

Speaker 3 - 00:12

No, we have hot in a sense.

Speaker 2 - 00:17

Okay. We don't have heating, so we just get cold. We are in freezers. We can't hear you.

Speaker 3 - 00:27

Playing music here. Wait, Sorry.

Speaker 2 - 00:38

So he's gone. He's left us.

Speaker 1 - 00:42

He's re. Whatever you call it. While he's re. Whatever, I'm gonna run and get some socks.

Speaker 2 - 00:47

Reconnecting? Yeah, yeah, sure.

Speaker 1 - 01:08

Sometimes my dog will come and sit on my feet, but she's not.

Speaker 2 - 01:11

Okay. Okay. Where is my tan?

Speaker 1 - 01:18

I just admitted him, so he should be right here. There he is. Now you're up. Oh, there you are. Better?

Speaker 3 - 01:32

Sorry. I think the kids were playing with the Spotify or something and started.

Speaker 1 - 01:38

How old are your kids?

Speaker 3 - 01:41

The older one is eight.

Speaker 1 - 01:46

I think. It's a girl, right?

Speaker 3 - 01:48

No, it's a boy.

Speaker 1 - 01:49

Oh. I'm trying to think because I met one of your children. I was there for the birthday party.

Speaker 3 - 01:55

Yeah, you're right. I have a boy and a girl. Like, the old one is eight and the girl is three and a half.

Speaker 1 - 02:07

Wow.

Speaker 3 - 02:09

Yeah. And eight becomes already, like, fourth to handle.

Speaker 1 - 02:15

Yeah, yeah.

Speaker 2 - 02:16

They're young teenagers already. I love eight.

Speaker 1 - 02:21

Seven and eight. Like, you know, I have to say that, you know, in the. When I got out of college, I was a teacher and I taught dance. And my favorite age was boys who were like 6, 7 and 8. That was just, to me, golden because they were so free and they weren't kind of, you know, they. They were still. They hadn't gotten to that part where they were self conscious. I don't know. Girls are a little ahead of the.

Speaker 2 - 02:53

Game, though, you know?

Speaker 1 - 02:55

Yeah.

Speaker 3 - 02:59

Macintosh and Windows.

Speaker 2 - 03:03

That's a good one. I'm gonna use this.

Speaker 1 - 03:07

Do you have children, Divya?

Speaker 2 - 03:09

No, I don't.

Speaker 1 - 03:11

Okay. I was thinking that you have so much traveling, it would be hard to do.

Speaker 2 - 03:15

Yeah, yeah. Me and my husband decided not to have kids and grow them in this funny environment, you know, climate wise and as well as the political wise, you know. So India is going through really funny political times.

Speaker 1 - 03:30

Yeah.

Speaker 3 - 03:31

Tell us the bits. I'm really interested to hear what's going on india.

Speaker 2 - 03:36

India, you know, from last four years. This government is giving us so many. Not four years now. It's going to be like more than six years. For last six, seven years. They are just giving us breaking news every day. So, you know, it's like, you know, you they have done the demonetization which was really, it was a fallback because you know, it has brought the Indian economy 30 years back. So a lot of. And the whole pressure is coming on the middle class. Nothing is happening to the elite or poor class.

Speaker 3 - 04:10

Never happens to them.

Speaker 2 - 04:12

Yeah. So you know, that is they are somehow you know, making everything corporate there. They want cooperatizing or they want privatizing everything. So you know, if they do that, so we cannot control the prices. And India was running on a parallel economy like Italy or any other place where, you know, the black money is from the past. So you know, the women always used to collect some money hiding from their husbands or hiding from their family. So they used to have it for the bad times. But this demonetization has actually broken the whole system of middle class. So one thing that was really brought us back economy wise because India was really growing economy. Now again they are saying that on gdp, you know, on paper it looks very good that India is growing.

Speaker 2 - 05:02

But day to day if you meet people are really going through bad situation. And now with they introduced the CAA which was being introduced by Congress. But bjp, you know what they introduced the CAA basically, you know, it was an amendment form which was for the citizenship law. Basically that who can be the citizen or the people who came in the 70 war from Bangladesh, they should be going back to their own country or they should be going to their respective places. So if this happens or this is implemented, which is already implemented, but now they are doing the cataloging of the people. So once the cataloging is over, so we will have to face the Rohingya situation again.

Speaker 2 - 05:54

So you know, India will also a lot of Muslims out of the country and they are claiming that they want to bring the Hindus who are in Pakistan. So it's complicated, you know, so they are mixing religion, economy. So it's really complicated. And now they brought another thing which is farmer's law. So you know there is a msp. So the government used to decide MSP rate for the grain

corporate handles the grain, they cannot go and claim because they don't have a capacity to fight any legal rights. They don't have the money, they cannot go to the court, they cannot pay the lawyers nothing. So that's why they are sitting on the. It's a very silent protest. And whatever has happened, there were goons from the government itself who has done the whole havoc situation was created by them. So nothing was done by the farmer itself because farmers are doing a very silent protest.

Speaker 2 - 07:40

This time it was really cold weather. So you can imagine they were sitting on the roads and having no means of. I mean they brought their own things, they brought their rich farmers. I'll say they are not. Or maybe they are rich at heart and a lot of people supported them by giving them the quilts and other things. So they managed somehow. But almost 210 people died because of the cold or other problems. So you know, but there is no Corona there, thankfully. Otherwise we would have, you know, there was a spread of Corona. Thankfully nobody, no case of COVID is being found over there. And that's a positive situation. But now they are trying to throw them out. Now they are putting these big barricades which is like 50 foot long barricades for farmers. I mean this is like very. Sounds like here.

Speaker 2 - 08:41

Yeah, I mean it's not a border area. It's not border where you need to put this many, you know, kind of what you call barbed wires and other stuff to create this big border, you know, between the farmers protesting silently and the government. So you know, now they are calling them terrorists. They are bringing other political stuff which is a Khalistan. There was a group in 84 or early 80s which wanted to get separate from India and make, you know, make Punjab as a new country. So they wanted to make that where they wanted some part of Kashmir. So it was complicated. So you know, it's really. So they are saying these are those people but they are just normal farmers. They are just, you know, kind of complicating and they are corrupting the mind of others.

Speaker 2 - 09:34

So you know, people who are seeing the news and most of the news media is bought by the corporates who are supporting the government. Only one, no two news channels are good to give the right news. Other channels are just talking what government wants. So they are speaking on the government agenda. So, you know, that's why 80%, or I'll say 90% of the people of our country who cannot think or they don't have critical minds to think, they cannot put two and two together. So those people are just, you know, supporting the government and not the farmers. So it's really strange times, what's going on. And we are following the news, but it makes us sad every day. So, you know, every morning you get up and you hear this sad news and then you start your day with sadness.

Speaker 2 - 10:24

So, you know, it's like what's going to happen to this country is very unpredictable now at the moment.

Speaker 1 - 10:32

Yeah.

Speaker 2 - 10:33

In short, now this is everything is. In very short.

Speaker 1 - 10:38

I want to hear your version of Israel.

Speaker 2 - 10:42

Oh, yeah, I heard that Gaza is going to give away all the steel and metal to, you know, for melting. So yesterday it happened, right? They announced that whatever trash is there, the metal trash, the bombing shells and everything, so it's going to be given away. I would like to collect some. Sorry, I can't hear you.

Speaker 1 - 11:08

Matsun,.

Speaker 3 - 11:10

You hear me now?

Speaker 2 - 11:12

Yeah, yeah.

Speaker 3 - 11:14

So I didn't hear news about Gaza, but also because here Gaza is kind of like, it's further away from than India maybe. Like, we almost don't hear internal news from Gaza.

Speaker 2 - 11:28

Okay.

Speaker 3 - 11:29

Here we all the time running around in the same circle of who is in favor of Bibi, the prime minister, who is not, and how the government is not functioning or everyone has his opinion. We're kind of like in a situation that the society is actually falling apart. It has the feeling that all the. Let's say that when Israel was established more than 70 years ago, there were a few problems, some problems in the letter, in the essence of this establishment. We had there different people. The Palestinian that replaced them and moved along, and then the ultra orthodox. And each time that there was a problem, it was never really dealt with.

Speaker 3 - 12:24

And now when Covid is here and Covid is **exposing** all this untouched parts of the society and like the conflicts that were never touched, you can really see how deep and fragile, like how fragile the Israeli society is. And **we** have a government that actually is emphasizing this, the fear and the hate between the different parts of the society. So we are also here in a **situation** that things feel like unstable. And every **2** day **you** wake up to more bad **news**, or actually we're here kind of like waiting

know, like the scientist scenarios, we are passing all of them and the heating up of the earth is. Is proceeding and much faster than we expected. In a sense.

Speaker 1 - 14:23

Yeah.

Speaker 3 - 14:24

One of the things, you know, like we started by saying that this was one of your reasons for not bringing children to this world. It's actually, it's a very interesting topic, you know, in a sense, because we still move on as if normal and if. Yeah, we'll manage it. No, it will be hotter, but we'll put on air condition. I don't know what. But it's not exactly like this. It's going to affect our lives in such a deep way. But still it is interesting, you know, like for us people that are already in the prime of their life, I think this is the most interesting period to live in.

Speaker 2 - 15:09

Yeah, I think I was reading this, Yovel Harari's new book, 21 Lesson for 21st Century. So I, you know, in that he mentions that, you know, the younger generation have to learn, like, to transform very quickly, you know, because you have to learn, unlearn, and then transform quickly. Because time is changing very fast now with the climate change, this will happen very quick. So we have to adapt the different climates, we have to different adapt the different politics and if the AI and, you know, the biological science, what that's gonna do, you don't know. So, you know, you have to kind of learn quickly. And I think you have to learn the scripts, which I am gonna be dead for sure. I am not gonna learn that. Yeah, sorry, just. I'll just tell my assistant to open the door because my stuff is coming.

Speaker 2 - 16:09

Give me a second.

Speaker 3 - 16:10

Yeah, yeah, no worries.

Speaker 1 - 16:16

Matan.

Speaker 3 - 16:18

Yes?

Speaker 1 - 16:18

Just to say that since we got a new president, just talking about miracles, instead of every day waking up to bad news, it's become like every day. Not that there isn't a lot of bad news, because there's still a lot of crazy people running around and having more power than they should, but at least every day we get some good news, some other law has been struck down or some other reasonable thing has been written in. And it's like his first visit was to the State Department, like, you know, just sort of establishing that as he says, America is back, we are not going to kowtow to the Russians and, you know, and that we're in the world again in a different way. So we'll see what happens. But at least it's not like garbage in the morning. So that's been huge.

Speaker 3 - 17:31

You know the story of the goat, the rabbi and the goat?

Speaker 1 - 17:34

No, what's the story of the rabbi and the goats?

Speaker 3 - 17:36

Like this. There is this old woman that says. Goes to the rabbi and says to him, listen, Rabbi, my house is too small for me. So he tells her, all right, put in the chicken.

Speaker 1 - 17:48

Okay?

Speaker 3 - 17:49

So she puts in the chicken. She lives with the chicken. It's a mess. Then she goes to the rabbi and says, listen, I put it in the chicken. It's even worse now. What do you want from me? Put in the goat now. So she gets the goat in the house, live with her for a while, and then she's suffering, goes back to the rabbi, and then he tells, okay, so take them both out now. And then suddenly she feels the house is huge and she has. She's not complaining anymore. So you took out the goat?

Speaker 2 - 18:18

Yeah.

Speaker 1 - 18:20

That's a good one.

Speaker 2 - 18:21

That's a very good one.

Speaker 3 - 18:24

But, you know, it's. Sometimes I think there is, you know, like Trump was. Trump was an obvious goat.

Speaker 1 - 18:34

Oh, my God. Goat is too kind.

Speaker 3 - 18:39

In the sake for this story, let's say. Yeah, but there are so many untouched goats in the American society.

Speaker 1 - 18:46

Oh, my God. Yes.

Speaker 3 - 18:48

Like, if this will be. If there will going to be a change, it has to be such a deep change. It's not going to the same tactics in the same ways. But I think we understand that we need to change in the most profound way, not in, you know, not going back to the same old.

Speaker 1 - 19:11

Right, right. Yes, it's key. I mean, I think with all. With all three countries, it's like the fissures are really deep and so. Sorry. No, no, it's okay. It's nice to have to see like the background of people working in your studio.

Speaker 2 - 19:31

Yeah. So this is the work which is going to Asia Society. So they just brought the frames.

Speaker 1 - 19:36

Cool.

Speaker 2 - 19:36

I just want to see it for one or two days. Then Monday we will ship it.

Speaker 1 - 19:41

So this is the triennial that you're part of.

Speaker 2 - 19:46

Yeah, yeah. I'll let you know.

Speaker 1 - 19:47

Please go visit Oh, I will for sure.

Speaker 2 - 19:50

Yes. Now I can't travel. Which is.

Speaker 3 - 19:53

Where is it?

Speaker 2 - 19:55

It's in New York. Asia Society. Chinese. Yeah. So it's basically We Do Not Dream Alone. That's the title of the exhibition. So I did a new series over, which is the Final Feast. So I was working on this from a long time where I am, you know, kind of contesting the idea of going to the Mars, you know, leaving this planet and going to the Mars. Because now this is a new, I think, new love of elite to go to the Mars and buy space on the Mars or the moon. So they are buying spaces like there are two people from India who bought this space. Once they bought it, I was like, my God, people are crazy. I mean, they can't make this planet livable and they want to go to another planet. So that is a very absurd idea to me.

Speaker 2 - 20:44

So I did a series of. I mean, where I staged the photographs where these people who are going to leave the Earth, they are like 20 people, but so they are having this last supper, basically. So I did a new luck.

Speaker 1 - 21:00

21:05

You just dropped out for a minute.

Speaker 2 - 21:02

Okay. So I was. I was. I was doing this. Yeah. So 20 people who are having this last supper, you know, the final feast. So I call it Final Feast, where they are just enjoying the last meal before leaving the Earth. And then there is this hostess, you know, who's in very, I'll say, very elaborated clothing. She is. She's cutting the cake of the Earth. So basically she's cutting the blue planet and then leaving to the Mars. So that's the situation which I created. And yeah, so I'm very excited about this new series of work.

Speaker 3 - 21:43

It's video.

Speaker 2 - 21:45

No, it's still photographs. Video we couldn't do because I asked all these elite of Delhi to be part of it. So I couldn't take more than six hours of theirs. So, you know, we couldn't shoot the video because video, were not getting the right expression. So I said, okay, this is not working out, because I wanted the real elite to be part of it. So I told them that you're gonna be used in this situation, and I'm condemning

And now all those people, you know, that time they Were all making fun of me. What are you doing? This is not going to be in our lifetime. So, you know, the weather is not going to be that polluted now. You see, everybody is wearing the mask. So it's like they called me. They said, now you have done a prophetic work, so everything is coming to be true said. Okay, so. Yeah, so. But, you know, this is a situation that, you know, artists can see certain things and it doesn't happen every time, I won't say, but you get some ideas, you know, like the poetry is such that you have to catch the words. So some words have been fallen into. Fallen from the space. So something like that. So, you know, it happens sometimes that some works appears from somewhere else.

Speaker 2 - 23:22

So I believe in that. That energy actually guides you. That intuitive. You need to feel that intuitiveness or those intuition actually guides you for making work.

Speaker 1 - 23:35

Yeah, yeah. So this, I mean, when you said something about staging a meal, I immediately thought about the rooftop, which.

Speaker 2 - 23:45

Yes, we are doing that with Matan. Yes.

Speaker 1 - 23:48

So I'm just curious if you two have talked about any ideas because it's listening to you. You're so aligned in your worldview. And I don't think. I mean, it doesn't surprise me, but it's even closer than I would have imagined. So I'm curious what the two of you are thinking about doing together. Even if none of it is going to be what it turns out to be, which is generally the case.

Speaker 2 - 24:23

I am hoping something will definitely come up, but Matan will be a better guide to, you know, because I was thinking of narrating stories over a meal. Like, I'm doing one exercise with the museum here in Delhi, which will be, I think we are doing it in the first week of March, which is basically, you know, we are. So I am creating this immersive experience online. Like we three of us are sitting together and I send you a recipe beforehand where everybody prepares a meal, which is like khichdi. Khichdi is like Indian risotto. So I'm gonna send a very staple food. So anybody can make it. Anybody can, you know, anybody can consume it. So it's a healthy food, but it's generally served when you are. Sorry, I think my Internet is little unstable. I'm audible, right?

everything is in this age of reason, where we are asking, everything needs to be logically answered. So how the food was grown, how, you know, so these are the basic question, where do we come from? What are we and where are we going?

Speaker 2 - 26:32

So that is what I am looking at with this series of talk, what we are doing here in the museum. And then I'm inviting three of the researchers and one is a journalist, one is a heritage person, one is a. One is basically environmentalist and a journalist. So three, I mean two journalists and one heritage expert. So those people are going to talk about the changing of mapping and one is going to talk about the land rights and agrarian issue right now. So basically, you know, so how you bring the conversation slowly to the public that how art can intervene or involve people through artistic journey, that becomes a performance online. Because we have to find ways that how we can think of doing things online together.

Speaker 2 - 27:24

Otherwise I would have made the meal and then shared with people and then spoken about the rice and the pulses, where do they come from? And they are the staple food of India and how it is being grown and how much water it consumes, how much soil it consumes. But if it is contaminated, how much arsenic is there? Because rice is the biggest carrier of the arsenic. So you know, how. So you know, it's basically the weaving of everything, the politics, the economy as well as the ecology. So we need to have the balance. Otherwise we will be, you know, starting another conversation over our sustainability.

Speaker 2 - 28:11

So that's what I'm doing here and I'm looking forward to do in Israel also that how we can bring the cultural practitioners together on the table and we can share, they can share the recipes or we can find the recipes. So over a dinner we will have a discussion that will be recorded or you know, I don't know how it will turn into a film or just into tables. So basically table conversations. I, I think that's what Matan is already having over there.

Speaker 3 - 28:47

Right. Right now we don't have any tables, meals, you know, like everything is closed. We've been to.

Speaker 2 - 28:55

Yeah, yeah.

Speaker 3 - 28:56

I mean lockdown for a while. But hopefully until you come, who knows what will be the situation. You know, in general I only think that like come very open minded, you know, like come with few ideas and we'll see what, what becomes more, you know, like what's more relevant or what's more touching in the moment that you are there. But it's good to have kind of like a backup ideas.

Speaker 2 - 29:32

I'm sure you have some idea. Yeah, but you know, I was just.

Speaker 1 - 29:38

Gonna say also we have these weekly dinners, we call them salons but you know they involve about 20, 25 people. And so there's sort of a built in opportunity for you to do that.

Speaker 2 - 29:54

Yeah.

Speaker 1 - 29:54

You know, so, you know, whether or not it's part of a longer term project with Muslima or not, we could still do that as you know, part of that period. Assuming that we can all gather, which I want to believe will be possible because everybody in Israel will probably be vaccinated by the fall, right?

Speaker 2 - 30:21

Yeah, hopefully. Right.

Speaker 1 - 30:23

What do you think Matan?

Speaker 3 - 30:25

Everybody know because there are many people that are against the vaccination. So I'm sure not everybody will be vaccinated. And you know, I think the vaccine is going sooner or later they're going to be something that will bypass it. You know, one of the, you know, the new type of viruses that is evolving, you know, it's a bit kind of like arrogant from us human to think that only us evolve. The virus is evolving faster than us in a sense. So in a sense we need to remember that we know nothing about what's going to be in October. We can try to assume that we need first of all to work with whatever there is.

Speaker 3 - 31:23

I think this is part of what I see as interesting is to kind of like to be present and to see what's the situation and then to react and to be in contact with the real material that is coming when you are there, when you are present, you touch the place.

Speaker 2 - 31:44

Yeah, no, I got really interested with the news yesterday when they said that they're gonna sell all they're gonna, you know, reuse the metals found from Gaza. So I think if, please keep a check for me. If something comes, I would like to do something with that because I think I am really interested in waste materials, waste which we are creating in the times. Like the new series of work I'm doing is with lot of urban waste Created india. So I'm kind of making kind of, you know, absurd objects, I'll say. Or the geometrical objects, which can talk about other space, other planet or some other zone, I don't know. But I'm still. I'm still preparing to make those. So I'm in process right now. So I think I'm really looking at the new waste, what we are producing.

Speaker 2 - 32:50

So if that happens, I can look at that material too. But yeah, I mean, I will keep myself completely open. I hear you. And we will see how it evolves. Because Alice has already sent us lot of material to read, which is really beautiful.

I didn't read it.

Speaker 1 - 33:50

Oh, it's. It's Amos Oz, right?

Speaker 2 - 33:53

No, it was written in 60s as I read. Because it was post. Post the post war. Yeah. So it was written in 60s.

Speaker 1 - 34:05

Yeah. And it's sad. It's a sad book, but it is so beautifully written and it. Yeah, it gives you a sense of the country like early on.

Speaker 2 - 34:16

But hold over here.

Speaker 1 - 34:18

I won't say more anyway. Do you guys. I'm open if you have more to talk about and I can even get off the phone if you want. But what I was.

Speaker 2 - 34:34

Matan, do you have any questions or. We look for the time when it comes and then we jump into things. I like making things rather talking literal about it.

Speaker 3 - 34:48

You know, we are. We're talking about October, right? This is. Right now.

Speaker 2 - 34:52

The.

Speaker 1 - 34:53

That's the plan.

Speaker 3 - 34:56

October is so far away from me. I need to still pass this summer.

Speaker 2 - 35:01

Yeah,.

Speaker 3 - 35:04

But, you know, like, let's. We have. The WhatsApp connection is the easiest way to like sometimes send like ideas and thoughts or if you have a new work, I'm always interested to see what you're doing, something interesting. I'll send you also.

Speaker 2 - 35:25

And if you think you can connect me with some people, that'll be great. So I can. I can start Talking to few people to just find out that. Because, you know, I like to talk to people. And if you can, if you're going to the market and send me some pictures from the market or wherever you are walking. So, you know, you think that, okay, this is relevant to send it to Viva. So, you know, I'll get a sense of place and people, which will help me to kind of navigate with the behaviors so that I can prepare myself to talk to them in that sense.

Speaker 1 - 36:00

Oh, speaking of chickens and repurposing, there's a place outside of Jerusalem which we plan to bring everybody to, but it's called the Echo Village and Kibbutz that got taken over by a dance company called Vertigo. I'll send you their information. But basically they took the old chicken coops and made them into studios.

Speaker 2 - 36:27

Oh, nice.

Speaker 1 - 36:28

Yeah, yeah, it's a very. It's a very. You've been there, Matanya?

Speaker 3 - 36:33

Yeah, I even danced there.

Speaker 1 - 36:36

Yeah. Oh, yeah.

Speaker 2 - 36:39

Oh, Matan, do you dance?

Speaker 3 - 36:44

As part of my fun in life. Yeah, dancing. My partner in life, she's really into dancing. She has a dancing group and for her, that's kind of like her to work with. Body and soul integrated.

Speaker 2 - 37:06

Nice.

Speaker 3 - 37:06

So we sometimes. Sometimes she invites me also to them.

Speaker 2 - 37:12

That's what I heard that you dance there. Did you say that?

Speaker 3 - 37:18

Yeah, it's a dance company. Like over there. It's a dance company. They have a beautiful space.

Speaker 2 - 37:26

I would love to go there to see it.

Speaker 3 - 37:30

Sometimes you have like overnight or weekends workshops. You can go there for a few days.

Speaker 1 - 37:36

Yeah, yeah. They do a lot of earth stuff and. And the whole place is like a completely. It's almost self sufficient. They work on.

Speaker 2 - 38:01

Yeah, sound is today.

Speaker 1 - 38:06

Anyway, I. I think for now, keep talking. I recorded this so that I can share it. Reese, who's for us, is to. I don't know why it's cracking up. I wonder if it's on my end. I don't. I don't know. Anyway, when does your show at Asia Society start? Viva. I can't hear you.

Speaker 2 - 38:46

You're muted. Opens on 16th of March.

Speaker 1 - 38:50

So maybe we can schedule something very shortly after that so that Tracy and I have a chance to. And I want to include David Norris, who's the fellow. So maybe we schedule it like right after that so they'll have a chance to look at your work and then I'll share this with them just so they can hear some of your thoughts and then we can schedule an interview and. And then Matan down the line I'm going to schedule a conversation with you and I don't know, somebody that you'd like to talk to about what you do at mslala. So maybe. And maybe it's moderated by Ruth Cummings or James Somebody who's. Who kind of knows Jerusalem a little bit. But you choose someone who you think understands your kind of deep mission.

Speaker 1 - 39:47

We can talk more about that, but I'm doing, like, a series of conversations that people can join a lot in real time, and then, you know, they don't join.

Speaker 3 - 40:00

They can, you know, maybe. What's the name? It's a New York Peter.

Speaker 1 - 40:12

Wait, wait. You just went out, love?

Speaker 2 - 40:14

Yeah. No, no, can't hear you.

Speaker 1 - 40:19

Still Muted.

Speaker 3 - 40:21

Muted, yeah.

Speaker 1 - 40:22

Now you're back. Yeah.

Speaker 3 - 40:24

Okay, so anyway, there is an. This art researcher and a curator that is writing now about Muslima, and she's now writing an essay about us.

Speaker 1 - 40:38

Oh, nice.

Speaker 3 - 40:40

Like I was yesterday with her. And also zoom. And so she maybe can be interested to hear a bit, like, from her perspective. It also will. For me, it will be, you know, like joining two conversations.

Speaker 1 - 40:54

Oh, cool. What's her name? That's okay. You can tell. You can send me her information. That's all right. It's starting to happen to you too. You're a youngster. Oh, Say again? Yeah, you're back.

Speaker 3 - 41:17

No, I'm trying to look for her name.

Speaker 1 - 41:20

That's okay. You can send it to me later. That's not important.

Speaker 3 - 41:24

Livia. Livia Alexander.

Speaker 1 - 41:26

Oh, don't know her.

Speaker 3 - 41:27

But you know her.

Speaker 1 - 41:29

Wait, you're muted about.

Speaker 2 - 41:31

She is my good friend Livia.

Speaker 1 - 41:33

Really?

Speaker 2 - 41:34

Yeah, yeah, She's a very good friend.

Speaker 1 - 41:37

Yeah, that's really interesting. Although once again, not surprising.

Speaker 2 - 41:42

Yeah, she's doing a very interesting series of, you know, food and art. So that's the series I think she might be doing. Yeah, because she's covering my work too.

Yeah, that would be cool. All right. Oh, you know what it was? I think it was the sound of rapping, maybe. Or not.

Speaker 2 - 42:21

No, no, it wasn't. I think it was one of the headphones. I think either. I think Matan's speaking, you know. Headphones?

Speaker 3 - 42:31

Yeah, yeah, yes, my headphones.

Speaker 1 - 42:35

That's okay.

Speaker 2 - 42:35

Yeah, it was making crackling sound. That's okay. Now we have gone through it. Or maybe it's my Internet, because You know, they have slowed down the Internet services india, so now they are controlling the Internet.

Speaker 1 - 42:50

Yeah.

Speaker 2 - 42:51

I don't know what's happening india,.

Speaker 1 - 42:54

But you have a vision and that's what's important. Like, both of you're, like, touching my finger.

Speaker 2 - 43:01

Anyway.

Speaker 1 - 43:02

Yeah. All right, well, like I said, if there's anything else you want to talk about, go ahead. Otherwise, I'll end our meeting for now. But,.

Speaker 3 - 43:15

Yeah, I guess we'll be in touch more recently. Like. Yeah, more often now. Okay.

Speaker 2 - 43:20

Yeah, we will be. I think WhatsApp is very good.

Speaker 3 - 43:23

So I'll show you the view. I'll show you the view from my balcony.

Speaker 1 - 43:28

Oh, yes, show me.

Speaker 2 - 43:31

Wow, that's beautiful. That's really amazing. Can't wait to visit it.

Speaker 3 - 43:42

Yeah. So this is where I live.

Speaker 1 - 43:45

Where is it?

Speaker 2 - 43:46

Above.

Speaker 1 - 43:50

Sorry, where is this?

Speaker 3 - 43:53

It's called Enkaram.

Speaker 1 - 43:54

Oh, that's what I was thinking when you were in Nkaram.

Speaker 3 - 43:57

It's the most beautiful neighborhood in Jerusalem and maybe in the world.

Speaker 1 - 44:01

Yeah, I think it is. Really? I know.

Speaker 2 - 44:04

That's beautiful, actually.

Speaker 1 - 44:06

Yeah, it's very beautiful there.

Speaker 2 - 44:09

It seems like you're getting cold now. Your nose is getting red.

Speaker 3 - 44:13

Don't worry.

Speaker 2 - 44:16

Okay.

Speaker 1 - 44:17

Good moment to end.

Speaker 3 - 44:19

Nice meeting you. Lovely catching up with your exhibition.

Speaker 1 - 44:25

Take care.

Speaker 2 - 44:26

Thank you. Thank you. Thanks. Bye.

Speaker 1 - 44:29

Bye. Good to. Good to see your face and hear your voice.
